

**TENTH MEETING
COUNCILMANS
BLACKFOOT M. D.**

The council of the Municipal District of Blackfoot held their tenth meeting for this year with all the councilmen present.

The secretary reported that the car of lumber ordered at last meeting had been ordered and was expected in any time.

Massey-Harris Company and R. C. Morrow. The company reported that it was agreeable to pay one-half of the settlement acceptable by Massey-Harris Company. Councillor Wheatley then moved and it was carried that the offer from the R. C. Morrow Co. to pay the sum of \$12,500, one-half of the Massey-Harris Company claim be accepted and that the said Massey-Harris be paid the sum of \$22,000 as full settlement of their claim against the said A. P. Grain Co. and ourselves regarding grain delivered by R. C. Morrow the season of 1932.

The secretary reported that he had under the provisions of the Tax Recovery Act 1925, offered for sale by public auction lots 21 to 40, inclusive, block 14, plan 6783 A.D. and that no bid or bids were received. Four of the members of the council, Mr. John May, Mr. Glenison, Mr. P. H. May, offered to purchase the lots and other lands in the subdivision and negotiations followed.

Wilfred Gibson was present at the meeting and withdrew his appeal against the amount claimed for pound damages by G. R. Beaudin.

Councillor Thorpe carried a motion that a guard be opened upon the north west corner of 20-24-28 with Walker J. Harvey as possessor. Notices are to be posted at the point and in the Strathmore post office.

It was suggested that as many members of the council as possible attend the district convention in Strathmore, on October 26th.

Thirteen persons were recommended for relief making a total of \$25.00 for groceries per month and the necessary coal from the local mine. Accounts and paychecks as of Oct. by the finance committee were passed and ordered paid. It was also decided to send in the membership fee of \$20 to the Alberta Association of Municipal Districts.

Incumbent from the Hall Insurance board stated that they will accept arrears of half taxes less the July penalty, if taxes were paid in full.

**PROTECTION OF ROSES AND
OTHER PLANTS FOR
WINTER
(Experimental Farms Note)**

In parts of Canada where the snowfall is heavy, comes early, and stays all winter, ordinary perennials need no other protection, but in districts where the ground becomes bare in winter or a covering of straw or other material is advisable. Bulbs, such as tulips and daffodils, should be covered with old manure. At the central experimental farm, it has been found that daffodils sometimes kill out in winter, but a much of old manure seems to give the needed protection.

Except in the mildest sections of the country climbing roses, Hybrid Petals should be covered for winter. As climbing roses bloom on last year's wood the canes must be kept in good health or they will be very few if any flowers. When the weather turns cold the canes should be taken down from their support and tied together. The canes of roses should be laid on the ground and earth mounded up around the roots to the height of twelve or eighteen inches. Some varieties the canes are stiff and should be bent over as far as possible and tied to a stake that has been driven in to the ground. After the ground is frozen the canes should be covered with dry leaves or straw and those covered with leaves placed together to form an "oven" so that the water will drain off. It is important that the canes should be kept dry.

(Continued on another page)

**WM. MCCONNELL
APPOINTED JUDGE
JUVENILE COURT**

Wm. McConnell has been appointed juvenile court judge for the Glendon district. Mr. McConnell's trial will cover quite a large area, extending some thirty miles south and east and some considerable distance north and west of town. Evidently the government officials appreciate Mr. McConnell's work as justice of the peace and they are making no mistake in appointing him. Juvenile Court Judge. The call given by his many friends in congratulating him in receiving this new appointment.

**NEW LIBRARY
EXPECTS TO
OPEN SHORTLY**

Gleichen's new library will open just as soon as the necessary shelves have been installed, so state the committee in charge. All the local centers have been busy of late in collecting books. The committee is planning to have the books and when they get time the shelves will be put in place. At the present time, the books are being collected from the different residences in town, collecting books. They already have some 75 books on hand and hope with the assistance of the townspeople, who have books to donate to the library, to collect some 300 more.

Most people have many more books than they need or know what to do with and if they will donate these extra books to the library it would be greatly appreciated by the sponsors and committee. In charge, S. kindly lend over your books and see what you can do.

**GETTING READY
FOR POPPY
DAY, NOVEMBER 4**

Once again the local branch of the Canadian Legion are getting in readiness for their annual sale of poppies and wreaths. This annual event is necessary to secure funds for the purpose of giving assistance to returned men who find themselves in straightened circumstances during the winter months.

While it is now fifteen years since the termination of the Great War, the memory of it lives on. It is a fact that there are still thousands of veterans of the great conflict still suffering from disabilities that will not allow them a fair chance in competition with the more fortunate fit men. These men, while, perhaps receiving a small pension, and in some cases very small, are still handicapped and find that through their disabilities they have not been employed as regularly as they otherwise would have been and often find themselves in straightened circumstances which no doubt if they were fit, they would not be, hence the necessity of a fund to ensure that they are less of a burden. An added feature of much concern at this particular time has been the long period of depression that has left its mark upon many. There is every reason to believe that conditions will be better in the future, but the present situation with winter coming on will be a source of worry to many disabled returned men, and the support of every citizen is solicited to make the fund as large as possible this year. The drive takes the form of a sale of poppies on the streets and at the houses as well as wreaths to be placed on the monuments throughout the country on Armistice Day, November 11th. The poppies and wreaths are made by disabled returned men in their Veterans shops, and every cent of this fund goes toward relief for returned men. It is only a privilege to be able to place this fund, but when all is considered it is a duty of every loyal citizen.

**BOARD OF TRADE
SETS DEC. 1 DATE
OLD TIMERS BALL**

A regular meeting of the Board of Trade was held Monday evening in S. Lafer's restaurant. It was unanimously decided to hold the annual Old Timers dance on Friday evening, Dec. 1. This date was settled after listening to a detailed report of R. W. Harrison of the committee appointed to look into the matter. Many other details were discussed from all angles and it was hoped to make the dance a huge success. The charge admittance was set at 50c per person. Other details were left to be reported on at the next meeting.

The condition of the road going to Arrowood was again discussed and it was decided the matter should be investigated further and see if the road could be improved.

The library committee announced that they hoped to have the library opened and going full swing in about three weeks time.

There was not much other business done as the discussion regarding the old timers ball practically took all evening. At a meeting held Monday night among other things, thought up were:

Mr. McLeod of Lacombe offered to visit the district and give a lecture to those interested in the planting and growing of trees, shrubs and flowers. His suggestion was referred to the horticultural committee.

The question of a library for the winter months was brought up and as soon as the necessary library shelves are completed, the library will be operating.

The offer from a jeweller in Treason, Manitoba, to settle in Gleichen was left for discussion at the next meeting.

The proposal of entering a chuck wagon team in the Calgary Stampede, sponsored by Gleichen, will be discussed at the May meeting.

The suggestion was made to the town council that the fire chief S. E. Gordon, make an inspection survey regarding fire hazards and report on same to the council as an additional means of protection.

The condition of the Gleichen-Arrowood road discussed and it was decided to put the matter before Commissioner Graham and to ask that something be done about it this fall.

The road is extremely rough in places and Russian thieves have gathered along the road side and will likely cause a good deal of snow drifting.

COMING EVENTS

Nov. 4—Annual Poppy Day.
Nov. 5—Annual United Church food supper in Csm. Hall.
Nov. 10—Annual meeting Meadowbrook Hall, dance and supper free.
Nov. 16—Annual Armistice dance in Gleichen Com. Hall.
Nov. 22—Pomella and dance by the C.W.L. in the Meadowbrook Hall.
Nov. 27—Meadowbrook hockey club dance at Meadowbrook Hall.
Dec. 2—Annual Xmas bazaar of W. A. United Church.

**WILL TAKE WHEAT
ON SUBSCRIPTION**

The Call will accept payment for subscriptions in wheat, at the rate of 60-2-5 cents a bushel. That is three bushels of No. 1 or No. 2 wheat will pay a years subscription. This policy covers arrears, renewals or new subscriptions and applies to bona fide farmers in any part of Alberta. The wheat may be delivered to any elevator with a graded storage ticket made out in the name of The Gleichen Call and presented to The Call for credit. This exchange will be in force until definite notice of withdrawal. All farmers wishing to take advantage of it are requested to do so as early as possible during the grain marketing period.

The hiring is gained by money, the true friend by an obliging behavior.

**MODERN DAIRY
ESTABLISHED
BY J. O. BOGGIE**

J. O. Boggie now has the most up-to-date dairy business we have ever seen in this part of the country, having in every way complied with the high standard demanded by the provincial milk inspectors. The large barn used for cows has been partitioned off one half being used for the milking and the other half for the storage of milk, while the rest of the barn is used for the cows. The portion occupied by the cows has plenty of sunlight, white washed from top to bottom and the floors and stalls spotlessly clean. The new machinery measures used makes it extremely easy to keep the barn clean. The place is now well stocked with hay and feed of all kinds demanded by well kept dairy herd. Even the water brought in is in the barn and in cold weather the water is warmed thus taking the chill from the water for the cows of the present time some six cows, of whom five are Jerseys, are being milked and just as soon as arrangements can be completed Mr. Boggie will put in eight more Jerseys.

**FROM OUR POINT
OF VIEW****THE BUSINESS MAN'S FLIGHT**

Attempting to operate a business establishment at the present time is far from being a bed of roses. Purchasing power, greatly reduced by the amount of money in circulation, is further reduced by wage and salary cuts which have been brought into force the last few years. This means a smaller amount of money available for the purchase of those commodities which are offered for sale.

While this is going on, the tax all of the business man has an increasing tendency to soar. He may enjoy some reduction in the amount of municipal taxation consequent upon careful management of civic affairs, but his provincial and his federal taxes rise constantly and will probably rise still higher as governmental incomes are reduced and governmental expenditures remain at virtually the normal level.

The business man is thus caught between two fires. His opportunity to do business and to earn money is restricted by the impaired purchasing power of the individual, while the taxes that he is obliged to pay grow all of the time. Any whatever relief may be afforded other than in the community, there is none for him except to cease business and thus to place more people on the street.

Sympathy has been expressed for various people affected by the depression, but there has been little for the hard-pressed business man who is nevertheless, deserving of a great deal more encouragement and support than he has been so far given. His courage in tenacity clinging to his business and investments in the face of all the difficulties which beset him in one thing that may well evoke admiration all too often denied him.

And winter is coming—the village cow will get up smashing the sidewalk away.

The bees and the birds and the crickets too.

Will be long six months away.

The baseball game and its noisier mate

Will leave the ground to sled and skate.

The green-chill tree of the summer's prime

Will be bare and cold in the winter.

And the cold hard frost will nip, nip, nip.

As we shiver around in our poor old coats.

The Frost King Robber—he has no soul—

Will make us spend all our cash for coal.

And gentle spring, when it comes once more

Will find us poor as it did before.

**GUNNERS DANCE
SUCCESSFUL
SOCIAL AFFAIR**

The annual dance put on by the Gleichen Gunners last Friday night proved to be a great success financially. The committee in charge looked after their part well and were well assisted by Ed. Menard who acted as master of ceremonies. A lot of tickets were sold to people who did not attend, thus the financial part of the dance was assured before hand. Many more tickets were sold for the wrist watch which was drawn for shortly after midnight and W. Stenmark proved to be the lucky winner. Willie stated that a wrist watch was just what he needs, especially while in the reporters box, at the arena this winter. Last winter, the first time in the press box, Mr. Stenmark put on the board desk, a spring clip to hold pencils, pens, etc., and then laid his old watch down. A fine idea. The game proceeded. The Gunnery made a great attack and almost scored. The excitement was too much for The Call reporter, who brought his fast down on the resilient board desk with a great thump. Result, pens, pencils and watch disappeared to the floor some ten feet below. Fortunately the watch, which was made of excellent Swiss material came through the ordeal unscathed.

The first snow of the season started to fall Thursday, Friday and Saturday were quite cold, Sunday and Monday it snowed almost all the time and now covers a depth of some 1 1/2 inches or more. The roads are reported to have been badly drifted.

CORRESPONDENCE

Editorial Call: With respect to the report of the minutes of the Town Council meeting of recent date, in the last issue of The Call, I beg to submit the following observations.

1. The ratapayers who signed the petition in question, did NOT purport to represent any ratapayers association. Some signers were not members of any ratapayers association.

2. NO request was made in said petition for the audit of the books of the town as to the filing of caveats under The Tax Recovery act, etc., etc. Furthermore, the inspector made NO audit.

3. The inspector did NOT find everything in order as reported.

4. A twenty-five cent charge, hereafter, if such inquiry is to be made, is NOT in accordance with the provisions of the Town Act. It is contrary to its provisions. No council is permitted, under the provisions of the Town Act to capitalize on information requested by ratapayers, whether it be on tax arrears or any other public matter. I would suggest that the strange two-bit resolution reported as passed at the last meeting of the council, be rescinded.

Yours truly,
A RATEPAYER WHO SIGNED PETITION.

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem, which now confronts Canada in disposing of its chief article of export,—wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the great producer, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to meet her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium, all of which countries took large quantities of imported wheat either directly from the country of origin or indirectly through the London and Liverpool markets. Then came the Great War. Wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada, equal almost to enlisting in the army, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of wheat, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

For a time after the war, when the necessary work of reconstruction of their countries and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, to meet their own requirements and to save other emergency countries from starvation on the one hand, and the possibility of being required to pay excessively high prices on the other hand in the event of a further war or world emergency. They offered bonuses to their farmers to produce wheat. They fixed unreasonable high prices for imported wheat. They imposed prohibitive tariffs on imported wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effects of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of which is Canada, while the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain. But, Premier Bennett pointed out, whereas Europe's countries in 1933, just three years later, they produced 1,220,000,000 bushels, an increase of 320,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 15,000,000 and 100,000,000 more bushels of wheat than Canada. Italy will produce 75,000,000 more bushels than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada; and the United States will produce 400,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Dominican Republic, Hungary, Roumania, Yugoslavia, and the Soviet Union will produce wheat to the neighborhood of 175,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her own people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear,—fear of starvation in the event of another war which contingency is still hanging over Europe, and fear of ransom, or, in other words, of being again compelled to pay excessively high prices for imported wheat in order to stave off starvation,—the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown to wheat by the four great exporters of wheat, and on the other hand, that the chief wheat producing countries by European countries, except Russia, for a removal of some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual release in the tariff now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which will have to be considered, and many others which will have to be considered. However, the facts and figures here presented are undoubtedly of vital interest to the people of Western Canada and provide much food for serious thinking and planning on their part.

"I mean to know you. Did I once lend you money?"
"Did you get it back?"
"Yes."
"Then you don't know me"

Like America, Australia had to cattle until Australian exporters came there.

Paris plans to build many schools.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be made to suffer from various ailments, such as diphtheria, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Little White Stomach Remedy, a remedy that has relieved the distress of thousands of children. It is safe, reliable, and well known to the people of Western Canada and provide much food for serious thinking and planning on their part.

Progress in New Gold Fields

Large Amount of Work Done on Labrador Claims

Remarkable progress has been made already in the Labrador gold fields, according to Hon. W. J. Walsh, Minister of Agriculture and Mines, who has returned to St. Johns from the Lake Wabush district.

He was accompanied on the expedition by Dr. O. K. Selvig, geologist, and J. W. Foote, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile airplane trip from St. John's, has a population of 38 when they left.

Mr. Walsh and his party spent a week in the interior. They said finds were unusually scarce. Unsettled weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

Right Kind of Settlers

Those Who Really Want To Farm Are Valuable Asset

What happens if Canada refuses permission to British settlers who really want to farm? Well, one goes to Africa and produces a cash crop to Australia and becomes a sheep rancher; another takes a ship to New Zealand; still another becomes a tobacco grower in one of the far-off British colonies, and still another, with characteristic British courage, ventures into wheat growing on the prairies of the United States.

They report that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile airplane trip from St. John's, has a population of 38 when they left.

Mr. Walsh and his party spent a week in the interior. They said finds were unusually scarce. Unsettled weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

Open New Motor Road

Lord Harwood Warned People Against Making Racing Track

On a recent Saturday Lord Harwood opened a grand new motor road, which has cost £90,000, and is designed to provide an alternative route from Sheffield to London via Wisely toll motorists that this is meant to be a road, not a racing track.

He urged, "temperance" in the "speed" sense—upon those about to use it. "Be good with your new toy: don't break it."

He declared that the patience of governors who, having removed most of the old speed limit, may in desperation feel compelled to restore them is a mistake made for racing tracks.

Here, then, is the convenient and, alas, very new way. Its history began, only how accidents or it before this year made?—London Daily Mirror.

Denmark Will Study

Report of Lindbergh

Result To Decide Use Of Greenland For Aerial Bases

A commission of Danish experts will examine the report of Lindbergh's report on his experimental flights over Greenland, Premier Stauning said, and on his decision will depend the use of Greenland in connection with negotiations for flights across Greenland.

The aviation firm which Colonel Lindbergh represents applied for rights to maintain an air route via the Danish possession some years ago, the Premier said.

The application was rejected because we did not find a reasonable foundation for the belief in air traffic with landings under such difficult conditions as in Greenland," he went on.

Renat Even Heaviest Traffic

Czechoslovakia Satisfied With New Glass Surface For Roads

All sorts of experiments have been made in recent years in order to get the ideal road surface and a number of stances with which to make a road of glass, and glass roads are now found in several parts of Czechoslovakia.

The glass is produced in a factory and mixed with cement. It is then spread on a rough concrete bed while it is still wet, and finally the surface is finished with water-glass or a solution of it, to produce a smooth surface. Exhaustive tests have been carried out, and this glass surface has resisted even the heaviest traffic, and the quality is maintained by six-wheel motor lorries.

To Protect Game

Appointment of a body of game guardians in Alberta, to handle production of game now done by the Royal Canadian Mounted Police

By agreement with the provincial government by the Alberta Fish and Game Association in annual convention at Calgary. Steps to prohibit shooting of all migratory birds and to equip modern high power pneumatic guns also was urged.

Wanted Harder Tap

The after-dinner speaker dined on and on; one man nodded and presented his head on the table. The chairman said to him: "You are on the head with his gavel. The delinquent raised his head a little.

"It is harder," he said, "I can still hear him."

The nine Marxist brothers of Albin, Wyo., compose a complete baseball team in that state.

More than 250,000 persons are now employed by the British post office department.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first to Paris and then to Severs, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and scientific measurements of weight are based.

At Severs, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made since the year 1889.

The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce.

The prototype is made of a platinum alloy called iridium-platinum. In spite of the high resistance of this metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram or so, if minute changes occur they are reported to parliament.

Plans for the journey were kept secret lest bandits might attempt to steal the prototype. A kilogram of iridium-platinum is worth several hundred pounds sterling as metal alone while a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 in existence—one for each of the principal nations.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria, where he will take over military district No. 11, which includes the province of British Columbia and the Yukon Territory.

Brig.-General T. V. Anderson, D.S.O., district officer commanding military district No. 11, has headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and it is understood Brigadier W. B. Bennett, D.S.O., whose appointment to command military district No. 11 has been effective a short time ago, will go to Winnipeg to succeed Brig.-General Anderson.

Long Trip For Planes

British Machines To Fly 12,000 Miles Over Africa

Three large four-engine-carrying bombers are detailed to make later this year the longest and most ambitious formation flight yet contemplated in the history of the world.

The journey will be a round trip of 12,000 miles from Cairo in the east to Bathurst and Dakar in the west. Their route goes south for a few days, then westwards over French Equatorial Africa, Nigeria, the Gold and Ivory Coast, Sierra Leone, the Gambia, and the Senegal.

Both the great auk and the cahow are—were—birds, now extinct. The auk is extinct; Bermuda frigate is a crossword puzzle people, was a very large bird which moved around at night and buried itself in the sand by day.

The cahow, a pretty large bird too, stayed in the far north.

Tenardines are the avifauna of winds, travelling as fast as 400 or 500 miles an hour.

A new high-speed passenger and mail plane in Germany has a speed of 125 miles.

Freight Car Was Elusive

Ex-Sergeant Proved He Did Not Steal From Freight Car

An ex-sergeant brought an atmosphere of comic relief into a military tribunal at Paris, which is still hearing appeals from war-time criminal sentences when he successfully appealed against a sentence passed in 1918 of 15 days' imprisonment for twice abandoning his post.

Sergeant Nigon was ordered to escort a freight car containing 5,000 gun mags. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

The railway authorities assured him it would come back. It turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gun mag.

In reply to questions he said he did not sleep in the box-car because a soldier was only allowed to sleep in a horse car during the war. If he had slept next to it on the truck he would have been run over. He did not get inside because if he had done so they would not have been able to shoot the door. He declared he did not abandon his post because a post is a fixed point and the box-car was a movable object.

"It was a phantom car," he said. "It kept disappearing."

He was acquitted and the sentence quashed.

Has Radio Wave Pains

Tacoma Dairyman Is Obligated To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Bodker, dairyman in the Tacoma district, who suffers intense pain from radio waves unless he grounds himself.

Tacoma and Seattle specialists have decided they were baffled. Bodker some years ago began to suffer intense pain. Physicians could find nothing wrong with him, but the pains were like rheumatism, persisted from time to time.

One day he put his hands on a water faucet while suffering pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Official possessor of the toughest lungs in the United Kingdom, W. B. Angus, town clerk of Marlborough, Wiltshire, England, aged 63, won the National Town-Criers annual contest at Lyme Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Commodity prices in Belgium are increasing.

Improve cooking with CANAPAR

Reliable method of cooking meat, fish, and vegetables. No fat, no oil, no grease. No waste. No mess. No smoke. No odor. No noise. No heat. No fire. No danger. No trouble. No expense. No time. No effort. No worry. No pain. No suffering. No death.

Both the great auk and the cahow are—were—birds, now extinct. The auk is extinct; Bermuda frigate is a crossword puzzle people, was a very large bird which moved around at night and buried itself in the sand by day.

The cahow, a pretty large bird too, stayed in the far north.

Tenardines are the avifauna of winds, travelling as fast as 400 or 500 miles an hour.

A new high-speed passenger and mail plane in Germany has a speed of 125 miles.

Chance Meeting Recalls

Rescue During War

Ship Inspector Meets Sailor He Saved From Starvation Years Ago

A thrilling recollection in the days when British ships carried on a hazardous trade along routes infested with mine and German "sub" was recalled at Montreal harbor when Captain R. H. McKinnon, deputy port warden, boarded the steamer "Climax" in the course of an inspection.

Accused by a member of the crew who asked if he remembered him, Captain McKinnon found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain McKinnon's ship had been torpedoed off the Irish coast.

About to jump into the sea, the remaining lifeboats of the ship's master had been torn from some place on the deck. Returning he found a member of the crew, badly wounded. Picking the man up, Captain McKinnon carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

After two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the wounded man was given treatment.

Has Radio Wave Pains

Tacoma Dairyman Is Obligated To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Bodker, dairyman in the Tacoma district, who suffers intense pain from radio waves unless he grounds himself.

Tacoma and Seattle specialists have decided they were baffled. Bodker some years ago began to suffer intense pain. Physicians could find nothing wrong with him, but the pains were like rheumatism, persisted from time to time.

One day he put his hands on a water faucet while suffering pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Russia's New Canal

Water Route 141 Miles, Long
Constructed by Use of Prison Labor

Understandings of equal moment have been carried to conclusion with as little publicity as has the Baltic-White Sea ship canal, which Russian authorities recently opened to traffic. This canal, or series of canals, is 141 miles long and gives Leningrad and heavily populated districts of Russia a short water route to vast and largely undeveloped timber, mineral, oil and grain areas bordering on the White Sea and Arctic Ocean. The former sea route to these districts was around the Scandinavian peninsula, and involved a 2,200-mile voyage past the coasts of Sweden, Norway and Finland. It used to take 17 days to make this trip when the weather was exceptionally favorable, but now the journey occupies six days, and can be made at any time during six months of the year.

The Russian GPU, or secret police, directed construction of the canal and by use of prison labor completed the task in less than a year. The waterway is 50 miles longer than the Suez Canal, and 10 miles longer than the Panama Canal.

Creation of the waterway fulfills a dream that had been entertained for centuries. Because of the opening of this new traffic link Karelia and the Archangel district now can send their lumber, grain, ores, fish, oil and building materials quickly and cheaply to Leningrad, and railroads in return can transport manufacturers and industrial products of Novgorod, Moscow and other populous centers of central Russia to the new waterway for transshipment. It is reported that a million tons of goods are passing through the canal in its first year of operation.

Record Transportation

Letter From Vancouver Reaches England In Seven Days

Record for transshipment of mail via the air-rail route (British) from Vancouver to England was made when S.S. Empress of Australia landed in Southampton before letters from Mayor L. D. Taylor of Vancouver to the Lord Mayor of Southampton.

Mayor Taylor received a cable from Mayor Wooley, of Southampton, following the letter, which was carried across Canada by Capt. Frank Hawks on his cross-continent jaunt, had arrived last night.

"This record of seven days from Vancouver to Southampton demonstrates the skill and efficiency of modern transportation," the mayor declared, "and gives promise of speedy communication of the future between distant centers of the Empire."

A Real Business Man

A gentleman told one of his sons, a little fellow of eight, that a man had offered the room full of gold for his baby brother. "I will give you that sum," he said, "I can buy you everything in the world you want. Shall I sell him?"

The parent was delighted when the youngster replied: "Oh, no, father." "Then the boy added: "Keep him till he's bigger; he'll be worth more then."

Give any man half a chance and he will say something that he will regret later.

WAKE WOMEN

Take Lydia E. Pinkham's Vegetable Compound

Have you ever felt that you were too weak to do anything? Have you ever felt that you were too weak to have the strength to do your work? Women who are weak and run-down should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Headaches and backaches that come from a tired, run-down condition often find their remedy in this tonic.

At least of over 100 women who report on you so that they are benefited by this medicine. Write a letter to the publisher today and we will send you the results.

Had Thrilling Adventure

Montreal Woman Braves Hazardous Trip To Coast Of Greenland

Two summers spent with her husband on his trips up the west coast of Greenland in their motor launch on work for the Danish government have given Mrs. J. O. B. Petersen, a young Montreal woman, plenty of adventure. She admitted the life was not exactly a garden of roses. It had its dangers and its hardships, but the beauty and the glories, she felt, were more than recompense.

The dangerous thrill of seeing an iceberg born, tramping on treacherous ice pack, never knowing when they might split, founder, and buffet by heavy seas and wild storms in a small motorboat are merely a few of the hours of her experience in Mrs. Petersen. Many times the little boat had to dash for safety in some natural harbor or bay to avoid a breaking tide. Following a thundering noise which acts as a warning, explained Mrs. Petersen, a slab breaks from the main berg. Then you see the big monster tepee, slowly as first the faster and faster. It fills the air and commences to roll around and around, drawing up water and sending gigantic waves across the ice.

Sometimes it settles again until the sun, beating down constantly, 24 hours of the day, night, breaks up the huge berg into constantly. Mrs. Petersen expressed great admiration for the Eskimo, for their courage, cleverness and manly attainments. They were often unsanitary and their manner of eating food was not according to the standards of a more civilized nation, she admitted, but they were likeable people and true friends. Originally superstitious to a startling degree, the Eskimo, however, are becoming more rational, she believes due to the efforts of the Danish government to educate them and better their conditions. Mrs. Petersen pointed out, "Kia! I was in one northward, she said, "where to barn seal oil while the hunters were out constituted the greatest offense imaginable. Something which a chief of a tribe, believing the creature, or bad spirit, is in him. They also like to stay over a dying person to watch, or so they say, the spirit depart from the body."

Masons Discover Secret Room

Skulls At Least 300 Years Old Found In Old Building

An old packing case full of human bones and two skulls is the find of a Parisian named M. Glavot, who just finished an old manor house near Angers, France, which once was the property of the Baron Thénard.

The bones were working on the old building when they chanced upon a secret room by a concealed staircase. The major and county constables were called and an inquiry started.

The president of the prehistorical committee, M. Coulli, was asked for opinion and said he thought the list the skulls were at least 200 years old.

One seems to be that of an old man of African origin.

Heads Angrier's Club

Internationally-Known Author Is Elect

Courtesy Riley Cooper, internationally-known author, was elected president at the first meeting of the newly organized Malvern River Anglers' Club. The Malvern River is said to be one of the finest speckled trout streams in Canada.

Water Pratt, Montreal, was elected honorary president of the club; others included: Vice-President Col. St. Maurice Rogers, Jasper Park, and Secretary F. Withers, also of Jasper Park.

Oldest Highland Chief

Col. Sir Fitzroy D. Macleod, Scotland's oldest Highland chief, celebrated his ninety-eighth birthday recently on his Isle of Mull stronghold, Duart Castle. This home of his ancestors was built in 1550 and lay in ruins for many centuries until Sir Fitzroy fulfilled a long ago wish, a vow made when a boy, to restore it. Sir Fitzroy was so severely injured in the Crimean war that he was given only a few hours to live.

Make Home Into Hostel

Ruskin's old home in Brantwood, England, which was acquired recently by trustees of the education trust and others, is to be thrown open as a hostel for students and a conference center for scholars. The new hostel is a permanent exhibition of Ruskin's works.

Declares Hitler Is

Of Jewish Descent

Viennese Paper Has Scored Documents To Support Claim

Fortnightly declaration that Adolf Hitler, German chanceller and Nazi chieftain, had a good strain of Jewish blood in his veins started Europe some weeks ago. The statement appeared in the Oesterreicher Abendblatt, well known Viennese paper, and was substantiated by affidavits and sworn documents from many sources.

No delicate counter-proof of unadulterated Nordicism was produced from Germany itself, but the well-known Vossisches Zeitung, of Berlin, now under Nazi control, issued a short statement reaffirming that the German college of heralds had previously satisfied itself that in Hitler's ancestry was no strain of Semitic blood.

The Viennese paper affirmed that Hitler's maternal grandmother, Johanna Hitler, was the daughter of a Jew. Hitler, who was with three other Hitler left the ghetto of Poland, on the borders of Bohemia and Moravia, a century ago, and his high-spirited father, who was in Vienna. Her Hitler's father was afflicted by the burgomaster of Braunau, where Her Hitler was born, and his high-spirited father, who was in Vienna. Her Hitler's father was afflicted by the burgomaster of Braunau, where Her Hitler was born, and his high-spirited father, who was in Vienna.

Land Moves With Time

Seismograph In Westminster, England, Shows Definite Rise And Fall

England is gradually sinking into the sea, according to a recently published Government Blue Paper. But the sinking is not uniform. The rate of the subsidence is estimated at nine inches per hundred years.

According to the report, Folkestone, on the east coast, is suffering from "slinking feeling." It has sunk nearly 2 inches in the past fifteen years.

The Bank of England, in the heart of the metropolis, is over six inches lower than in 1865. St. Paul's Cathedral, on the other hand, has dropped only one inch in the same period.

That there is a definite movement of the land in relation to the movements of the tide has been confirmed by the tide gauge in the County Hall, Westminster, displayed a movement of the building corresponding with high and low tides.

For the last time, the poppy-crowned god Morpheus is a reluctant visitor. Dr. George L. Walton, neurologist, offers encouragement to his book, "Why I'm Not a Quack."

For Better Lives

Some Things That Everyone Should Hold On To

Hold on to your hand when you are about to do a foolish thing. Hold on to your tongue when you are ready to speak harshly.

Hold on to your heart when evil thoughts come to you. Hold on to your virtue—it is above all prices to you in all times and places.

Hold on to your foot when you are on the point of forsaking the path of right.

Hold on to the truth, for it will serve you well, and do you good throughout eternity.

Hold on to your temper when you are excited or angry, or others are angry with you.

Member of the Executive Council of the Government of New Zealand

Mr. Forbes, who is a member of the Executive Council of the Government of New Zealand, has been elected to the position of Minister of Education.

Many Masculine Competitors

Man Wins First Prize For Picked Quilt At Toronto Show

Men have found the prize awarded for handiwork and needlework highly attractive this year at the Canadian National Exhibition judging by the number of masculine competitors among the displays in the Women's Building.

Soldiers' hospitals and patients working in homes and hospitals under the direction of the Occupational Therapy Association for many years have been exhibitors in the craftwork classes since the prize list.

This group has been greatly enlarged during the past four years, and this year even the class reserved for women of 17 years of age and over was won by two men over 80 years of age, who had each made a quilt. James Price of 1141; Sherbourne Street carried off the prize in a pieced quilt which contains over 5,000 pieces of neatly sewn felt done in his regimental colors.

Fact Not Generally Known

No Harm Results From Occasional Loss Of Sleep

For those who are the poppy-crowned god Morpheus is a reluctant visitor. Dr. George L. Walton, neurologist, offers encouragement to his book, "Why I'm Not a Quack."

Making Six-Year Tour

English Club Collecting Receipts From Every Country In World

A Salford club, Harold Hignett, is engaged on the queerest world tour ever known, for he is journeying 35,000 miles in a motor car to collect receipts in order that he may add variety to Britain's culinary tastes.

Already he has visited Denmark, Germany, Ireland, Scotland, Norway and Sweden, and already his pockets are bulging with receipts which he has obtained in foreign lands.

Ancient Chinese Lifer

Shaped Their Money To Resemble The Object Desired

The ancient Chinese was a literal fellow. When he wanted a spade, for instance, he shaped his coin to resemble the object desired. Evidence of his ideas on talismans is displayed at the American Numismatic Association's Convention in Chicago.

Has Helped Experts

Birds hatched in Miami, Fla., last night have a potential

Bayeta on Thursday by air express from the United States to Colombia. Every week the isolated capital of Colombia is receiving by this rapid system of transportation many commodities that it never before imported from the United States.

That Depressed Feeling Is Largely Liver

Wake up your Liver! Without Calomel

What you need is a liver stimulant. Calomel is a powerful purgative and is not a liver stimulant. It is a laxative and its use is not recommended. You need a liver stimulant that will cleanse your liver and restore its normal function.

Cambridge Scientists

Return From Expedition

Bringing New Species Of Animals and Reptiles From Jungle

Cambridge Scientists

Return From Expedition

Many animals, reptiles and insects from unknown to man were discovered by three young Cambridge scientists who landed at Plymouth from an expedition into the unexplored jungles of the British Cameroons.

The adventurers, J. T. Sutherland, G. Russell and H. P. Sisson, members of the Percy Sladen expedition, have brought with them a collection of 7,000 specimens, in search of which they have penetrated into country hitherto untrod by white men.

A game warden who belongs to a species thought to have vanished ages ago. A five-foot male gorilla. One hundred and fifty specimens of mammals.

Beautiful Indian Capital

Everything In Jalpur Is Built On Fairly Hard Rock

The Maharajah of Jalpur, who has been in the limelight more than once of late, returns to it again by winning the Prince of Wales' Cup at the polo tournament in Calcutta.

His native Jalpur stands like an odd beautiful dream for everything there seems to be built on a fairyland. The houses in the city are painted in every conceivable shade of pink and purple, delicately traced with patterns of other colors, and they glow with the glow of the sun.

Retirement Well Earned

Two Sisters Served As Missionaries For 35 Years

Coral stones churches on scattered South Sea isles, a school for Micronesian boys and girls, the Bible and other Christian literature and school textbooks translated into Kusaian—these are some of the results of the work of two American sisters who started out from Newark, N.J., 35 years ago and now have just retired.

The sisters are the Misses Elizabeth and Jane Baldwin, and their retirement was voted by the American Board of Commissioners for Foreign Missions.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 229 injured in train accidents, the Dominion Bureau of Statistics says in a report issued recently. Statistics was an average of one killed for every 3,000,000 carried and one injured for every 62,000.

Waterproof Chases Ship

Huge Volume of Water Follows Liner

A waterproof playing tag with an ocean liner was the adventure experienced by passengers on the "Duchess of Devonshire" during a violent winter storm. The liner was on her way down the St. Lawrence from Montreal to New York on a cruise.

Accurate Summing Up

Motor speed law was not summed up in a court case arising as the result of a motor car accident.

It was held that the law was not a rule of evidence, but a rule of law, and it was to be generally known, that if you are going at such a speed that you cannot pull up within the limits of your vision, you are in violation of the law.

Little Helps For This Week

"O the depths of the riches both of the wisdom and knowledge of God, how unsearchable are His judgments, and His ways past finding out!"—Romans 11:33.

No star is ever lost we once have.

We always may be what we might have been.

Since good, though only thought, has life and breath.

God's life can always be redeemed from death.

And evil in its nature is decay.

And any hour can blot it all away; The hopes that lost in some far distance.

May be the other life, and this the dream.

—A. A. Proctor.

Old Fashioned "Cream Cooking"

At the cost of milk!

What you get when you use St. Charles Milk is a real cream, not an artificial cream. It is as rich as cream and gives a delicious cooked-cream flavor to every dish you use it for.
